DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a method of making a glass article, classified in class 65, subclass 406.
- II. Claim 32, drawn to an optical fiber, classified in class 385, subclass 123.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as one where no preforms are bonded together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

After a group is chosen (above), the following applies:

Claims 1, 13-14, 22 and 32 are generic to a plurality of disclosed patentably distinct species comprising:

Specie 1. : comprising A1, B1 and C1

Specie 2: comprising A1, B1 and C2

Specie 3: comprising A1, B2 and C1

Specie 4: comprising A1, B2 and C2

Specie 5. : comprising A2, B1 and C1

Specie 6: comprising A2, B1 and C2

Specie 7: comprising A2, B2 and C1

Specie 8: comprising A2, B2 and C2

Specie 9. : comprising A3, B1 and C1

Specie 10: comprising A3, B1 and C2

Specie 11: comprising A3, B2 and C1

Specie 12: comprising A3, B2 and C2

Specie 13. : comprising A4, B1 and C1

Specie 14: comprising A4, B1 and C2

Specie 15: comprising A4, B2 and C1

Specie 16: comprising A4, B2 and C2

Specie 17. : comprising A5, B1 and C1

Specie 18: comprising A5, B1 and C2

Specie 19: comprising A5, B2 and C1

Specie 20: comprising A5, B2 and C2

Specie 21. : comprising A6, B1 and C1

Specie 22: comprising A6, B1 and C2

Specie 23: comprising A6, B2 and C1

Specie 24: comprising A6, B2 and C2

Wherein A1 = bonding by wringing, A2 = bonding by chemical bonding, A3 = bonding by vacuum bonding, A4= bonding by hydrogen bonding, A5 = bonding by hydrophilic bonding, and A6 = bonding by covalent bonding.

And wherein B1 = end to end bonding (see figures 2A-2C) and B2 = side by side bonding (see figures 4A-4D).

And where C1 = no acid treatment (see page 10, line 4) and C2 = acid treatment (see page 10, lines 10-11)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

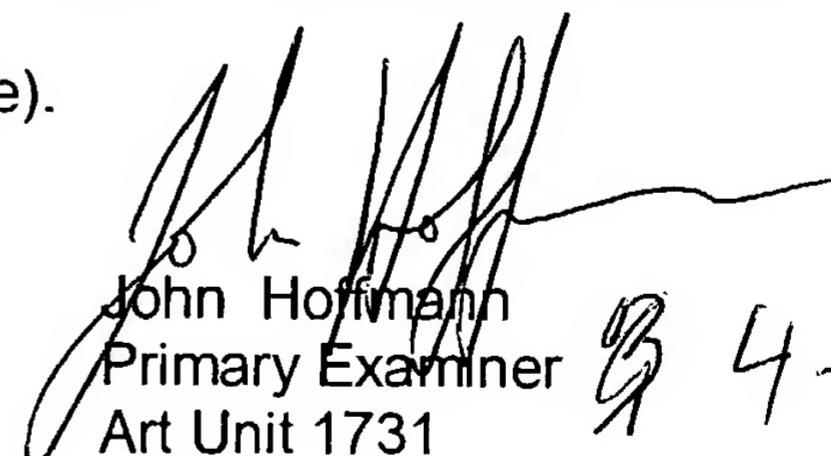

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Hoffmann whose telephone number is (571) 272 1191. The examiner can normally be reached on Monday through Friday, 7:00- 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
